DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to a system and method for securing a welding electrode to a welding torch, classified in class 219, subclass 75.
 - II. Claims 23-25, drawn to a method of manufacturing a collet body by drilling into a solid collet body member with a stepped drill bit, classified in class 408, subclass 1R.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a system and method for securing a welding electrode to a welding torch (Invention I) and a method of manufacturing a collet body by drilling into a solid collet body member with a stepped drill bit (Invention II).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1725

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
